

Volume Pedals

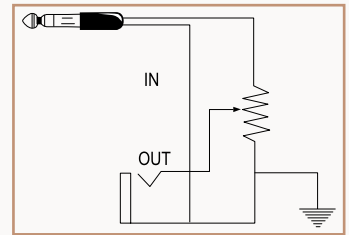

Volume pedals for guitars and keyboards. Manufactured in tough and durable ABS. Furthermore, our pedals are equipped with a mechanical transducer that eliminates unwanted noise. The base plate is made from zinc coated sheet metal. This gives the pedal extra weight and combined with the anti-slip feet, prevents the unit from sliding whilst in use. The potentiometers are in special rotation (30°) with linear graphite and are long lasting.

VM 10

Mono volume pedal for guitars, with assembled fixed cable and jack, allowing connection to the output of the guitar or any other instrument with mono output. The output of the pedal is then connected to the amplifier or similar source.

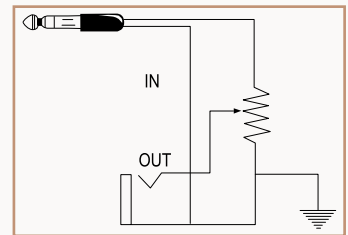

Type:
Inputs:
Outputs:
Impedance:
Dimensions:

Guitar volume pedal
 Cable 2mtr - jack mono
 Jack mono socket
 100Kohm
 86 (W) x 198 (D) x 60 (H) mm.

VM 10L

Mono volume pedal for keyboards, with assembled fixed cable and jack, allowing connection to the output of the keyboard or any other instrument with mono output. The output of the pedal is then connected to an amplifier.

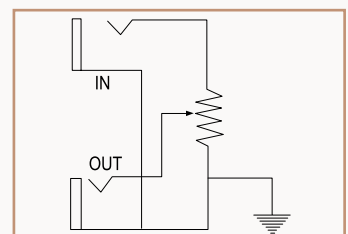

Type:
Inputs:
Outputs:
Impedance:
Dimensions:

Keyboard volume pedal
 Cable 2mtr - jack mono
 Jack mono socket
 20Kohm
 86 (W) x 198 (D) x 60 (H)

VM 12

Guitar mono volume pedal, equipped with a jack socket for input and one for output. The pedal-guitar-amplifier connection is made through two cables that link the pedal input to the guitar output or any other instrument with mono output and the pedal output to the amplifier's input.

Type:
Inputs:
Outputs:
Impedance:
Dimensions:

Guitar volume pedal
 Jack mono
 Jack mono
 100Kohm
 86 (W) x 198 (D) x 60 (H)
